

FROM *CONCEPT* TO *COMPLETION*

Design Solutions & Integration is a company dedicated to solving customer needs and expectations by using the latest technology and techniques available. With a team of individuals highly trained in Oil and Gas, Municipal applications (SCADA, Water-Waste Water Treatment), Process Control, Batch Processing and Material Handling, DSI differs from most organizations because the staff is comprised of individuals from the field that understand what is involved with each application. This allows those individuals the ability to develop a solution that will be user friendly and has the interest of the operator in mind. DSI is your turn-key source, creating your vision.

DSI prides itself on being a locally owned and managed integration company. DSI has positioned its staff geographically throughout the region in order to offer quick, reliable service for all customers, with locations in Sioux Falls SD, Stanley ND and Grand Forks, ND. DSI's mission is to provide the customer with a control/electrical system that either meets or exceeds their expectations. DSI and their employees are committed to seeing projects through to the end and providing service after project completion.

PANEL SHOP

Design Solutions & Integration maintains an UL508A/689A Control Panel shop in-house and on-site, allowing for quick and efficient collaboration between programmers, engineers and electricians. The Panel builders can work from specific drawings supplied by the client, or from custom panel layout drawings from DSI's engineers/programmers. Knowledge of power distribution and control schematics compliments the experience of the panel shop crew to produce the best panel for the job.
